AMIR DELDAR

Data Analyst | Business Analyst

Portfolio | callmedeldar@gmail.com | linkedin.com/in/amirdeldar | github.com/amir-deldar

TECHNICAL SKILLS

Data & SQL	**MySQL** (CTEs, Window Functions, Joins, Stored Procedures, Data Cleaning, Exploratory Data Analysis), **MySQ Workbench**
BI & Reporting	**Power BI** (Power Query, DAX, Dashboards, Conditional Formatting, Visualizations), **Excel** (PivotTables, Slicers, VLOOKUP, Conditional Formatting), Data Storytelling, Business Insight Reporting
Business Domain	Inventory Management, Warehousing, Stock and Sales Trend Analysis, Operational Reporting
AI Tools & Skills	**ChatGPT**, **Claude**, **Gemini** (Prompt Engineering, AI-Asssisted Data Analysis, Insight Generation, Dashboard Design)

PROJECTS

Layoffs Data Cleaning – MySQL *Data Cleaning*

- Cleaned **2,361** raw company layoff records into an analysis-ready table using MySQL
- Removed duplicates with **window functions** and filled missing values using **self joins**
- Standardized categories and converted text dates to the DATE type

Layoffs Exploratory Data Analysis – MySQL *EDA*

- Analyzed **193,000+** layoffs (2020–2023) across companies, industries and locations
- Used **CTEs** and **window functions** to rank top companies per year and track rolling totals
- Found that **Post-IPO companies drove about half** of all layoffs

Bike Buyers Analysis Dashboard – Excel *Dashboard*

- Built an interactive dashboard with **PivotTables** and **slicers** to identify likely bike buyers
- Cleaned **1,026** customer records by removing duplicates and standardizing labels
- Identified customers **aged 31–54 with short commutes** as the highest-converting segment

Data Professionals Survey Dashboard – Power BI *Dashboard*

- Designed a dashboard from a survey of **630** data professionals on salary, tools and job satisfaction
- Transformed raw data with **Power Query**, grouping answers and converting salary bands to averages
- Showed that **Data Scientists earn the most** and **67%** of respondents prefer **Python**

WORK EXPERIENCE

Warehouse & Inventory Data Analyst – Collection Bag & Shoes Shop, Rasht, Iran *2022 – 2024*

- **Optimized data accuracy:** Managed inventory data using Excel and GIV software, reducing system discrepancies by **15%** through rigorous data validation and physical stock reconciliation.
- **Improved stock turnover:** Analyzed sales trends and inventory movements to identify slow-moving products, leading to **10%** reduction in dead stock and freeing up valuable warehouse space.
- **Enhanced decision-making:** Prepared periodic reports on stock levels and product movements, directly supporting management in purchasing decisions and reducing overstock costs by **20%**.
- **Streamlined reporting:** Automated inventory tracking and reporting processes, saving approximately **5 hours per week** and improving reporting reliability.
- **Sales-driven replenishment:** Utilized data insights to optimize stock replenishment, ensuring high-demand products were consistently available and minimizing stockout occurrences.

EDUCATION

Bachelor of Applied Mathematics – University of Guilan, Rasht, Iran *2023*
